

Quilt Clima Balance

www.schlaraffia-international.com

Schlaraffia quilts, filled with high quality temperature-regulating fibres, give you the perfect sleeping environment. Optimal air circulation and moisture regulation prevent heat accumulation under the quilt and allow a healthy, deep sleep at a comfortable temperature. Morning after morning, this feeling of repose will give you extra vitality and energy. Schlaraffia quilts are the perfect complement to the Schlaraffia sleeping system.

Natural temperature control according to the laws of physics – scientifically tested.

Cover:

The finest German Mako satin, made from 100% breathable cotton. Printed with the Schlaraffia logo. Integrated temperature control zones made from 100% polyester fabric.

Filling :

High quality, silicone treated hollow fibres made from 100% polyester. Filling weight approx. 380 g.

Quilting:

4-channel quilting with 3-band temperature regulating zones. The sections filled with temperature-regulating fibres provide comforting warmth, while moisture is removed from the bed via the temperature control zones (this effect is up to three times higher than with conventional beds). Natural air circulation actively prevents heat and moisture accumulation. The temperature control zones do not absorb moisture, but actually transfer it. Air cushions in the temperature control zones prevent cold bridges.

Warmth:

Medium thermal conduction, suitable for use all year round.

Care instructions:

Washable up to 60° C. Suitable for dry cleaning. Can be tumble-dried.

Available in the following sizes
135 x 200 cm and 155 x 220 cm.

Packaging:

Cardboard pack with plastic cover included.
